Origin Story

Escaped a war-torn Vietnam with her younger siblings, Leong (brother) and Nga (sister), seeking her twin brother Tran. She discovered he was in the employ of their criminal uncle, and after an encounter with Spider-Man and the Fantastic Four, was forced to absorb Tran's power (both body and mind) to stop him from killing the heroes.

Xuan took a job at Xavier's as an administrative assistant while joining the New Mutants in order to provide for her siblings.

Abilities & Resources

Xuân is a mutant with telepathic and psionic based powers dealing in possession, mind scanning and limited telepathy.

Subordinate Personality: If she remains in possession of a host for too long, she will begin to think and act as her host would, and eventually her own personality would become subordinate to one identical to the host's.

Tran's Influence: It is revealed that ever since Xuân had assimilated her malefic twin brother into her genetic matrix that her personality has considerably darkened. To the point that her evil sibling barely even needs to exert his influence over her actions from time to time as a consequence of their fusion.
